EXCLUDING BOYS FROM THE BETTING RING.

Pool selling to minors will be stopped on the Salt Lake race track.

A committee of the citizens of Salt Lake protested against allowing young boys to mingle with the crowds around the bookmakers, during the betting between races, and, as a result, the race track people have agreed to exclude the youngsters.

With a few more reforms horse racing may be made a highly enjoyable pleasure devoid of bad features.

GIVE ALL THE WOMEN A DAY'S OUTING.

The women of the Relief Society of the Second Ward were given an automobile ride yesterday afternoon, after which they were guests at moving picture shows and a luncheon.

The women of all the Relief societies of Ogden are deserving of the kind attention of the people. They are the messengers of good who are constantly searching out the needy and offering aid. We are told that this body of women workers know no religious distinction when they discover a person in want. The families of the wards, into which poverty and misery have crept, find in these angels of mercy a ray of sunshine. Fatherless children and struggling mothers are helped. The children are clothed and fed and the mothers encouraged to feel the world is not so dark, but that there is a glimmer of light which promises something better. The sorrows are made bearable and abject poverty is banished.

To all workers of that kind, we take our hat in reverential respect. A little more of that humanitarianism and life will lose half its deep shadows.

We say, let the good impulse develop. Extend the automobile rides to all the kind, generous, noble, sweet women of Weber county, of Utah—who are members of the Relief societies.

SALT LAKE IS ABOVE OPPOSITION.

There is no end to the sorrows of Salt Lake. The Herald says:

Naturally, Salt Lake will regard the attitude of the outside counties, particularly of Weber county, with feelings of resentment. What possible profit can come to any outside community by injuring the chief city of the state and retarding its improvement?

The interests of all the counties are identical to this extent, that what benefits one helps all. To refuse a capital building to the state cannot affect Salt Lake's primacy. The only immediate effect is to announce to the outside world that Utah is unprogressive and that its people are so jealous of one another that no large undertaking like the capitol building can hope to be carried. That is not good advertising for any commonwealth, and the worst sufferers from it will be the people in the outside counties who are anxious to have foreign capital help develop their agricultural and mineral resources.

There you have it. "What possible profit can come to any outside community by injuring Salt Lake. That is self-sufficiency in its extreme form. If Ogden aspires to be the capital city and Salt Lake seeks to retain the capital, why should Salt Lake resist Ogden's effort; why should Salt Lake attempt to retard Ogden's growth? How does that sound? It sounds very much as though Ogden were imitating Salt Lake in assuming to be above opposition.

Ogden has a right to hope and to labor to be the capital of Utah. If that ambition injures Salt Lake, it is a source of regret that both cities cannot be the capital at one and the same time.

This consoling thought, that had Salt Lake's taxpayers been aroused they could have won the day, fails to take cognizance of the fact that had the taxpayers all over the state been equally aroused Salt Lake would have been still a few thousand short. As it is, the vote against the measure is greater than the entire strength of the taxpayers of Salt Lake county. When all parts of the state are heard from, the adverse vote will total over 9,000.

There are many thousand regular voters in Weber county, but only about 2,000 votes were cast Tuesday. That which would have drawn out an additional thousand votes in Salt Lake county, no doubt would have brought out a proportionately larger vote in this county. So Salt Laker must not account for their defeat by charging it to an unusual lethargy on the part of its taxpayers. Their cause was a bad one. That explains the heartaches.

OGDEN WILL SUBSCRIBE THE HALF MILLION.

Under the heading, "Ogden Should Now Ante," the Salt Lake Telegram says:

It seems that the people of Utah do not want any capitol that they will have to pay for.

Our Ogden friends should at once begin to raise that half million for a new capitol. The matter of removing the capitol to the city by the Weber can be arranged by the time our northern friends get that money raised.

It was a joke when Ogden started out to defeat the capitol tax, or at least the editors of the Salt Lake papers were convulsed with laughter at the idea of Ogden defeating anything Salt Lake proposed, but since the election these same editors have been rapping each other over the head with shillelals crying, "You did it!"

Now go right along whistling that tune, "Ogden Can't Raise the Half Million," and there will be another dark and dismal day in Salt Lake about two years hence.

INCRIMINATING SALT LAKE PAPERS.

There is weeping and wailing and gnashing of teeth in Salt Lake City over the defeat of the capitol proposition. The Herald charges defeat to the Republican, the Tribune accuses the "federal bunch," the Telegram points the finger of reproach at the people of Salt Lake and the Republican says the Tribune's support of the measure caused its defeat.

That is a lovely family to be mixed up with. The wonder is that any one from rural Utah ventures to enter a city so wicked even when forced to go there to transact business with the state officials.

AUTOMOBILES AND MOTOR CYCLES IN DENVER.

(Morning Examiner.)

Those who lately visited Denver state that the Colorado metropolis has more automobiles than any city of double its size in the United States. The women operate electric machines and the men have every size and style of gasoline automobiles from a runabout to the most powerful machines.

Packages from the stores are delivered by motor cycle, and newspapers employ the machines in the delivery of papers.

The automobile has come to stay and that is also true of the motor cycle.

Here in Ogden there are 110 automobiles. When the first one arrived a few years ago—an Oldsmobile—runabout, it was viewed as a novelty too expensive to be used as a toy and too uncertain to be relied upon as a serviceable conveyance. Now the automobiles are so indispensable that those who can afford them are as helpless as unborn cavaliers when their "autos" are temporarily out of commission.

The wonder is that motor cycles have not come into more general use in Ogden as they seem to be a most

rapid and dependable delivery machine. The "auto" and the "chug" machine have only one dangerous competitor in sight and that is the aeroplane. When these aerial machines are perfected, visitors from Salt Lake to the capitol on University Heights, to the east of Ogden, can make the flight, meet the governor and return while a Salt Lake policeman is walking a block.

SYRUP BILL AT INDUSTRIAL SCHOOL.

Ogden, Utah, June 10, 1909.

Editor Standard: In last night's Standard Mr. Scott stated that he had been informed by the State Industrial schoolkeeper that the syrup bill for the industrial school was over \$50 per month. In looking over our books, we find from January 1, 1909, that the syrup bill averaged \$36.25 per month, the amount for which we received vouchers. Yours respectfully,

(Signed) Utah Vinegar & Pickle Works.

The plan which is set forth is to extend the limits south and east to the eastern edge of Idlewild addition, taking in that place and also a large and populous neighborhood. The circulators have met with considerable opposition in their work because of the objection which has been raised that the extension of the limits means high tax rates for property owners in that neighborhood. The opposers, however, are thinning down as the circumstances are explained to them. It is argued that the excess tax would be a mere trifle in comparison with the many improvements and conveniences which would be possible in the district.

Among the principal boosters of the plan is A. N. Humphries, owner of Idlewild addition. He has circulated the petition and has succeeded in getting a large number of property owners signed up. Detective Schultz of the police department and others have also been working in the interests of the affair and hope to have it ready to present to the council soon.

DEMOCRATIC MULE TO ENTERTAIN.

(Silver State News.)

Goldfield, Nev., June 3, 1909.

To the Democrats of Humboldt County, Greeting:

On Flag day, June 14, the Democrats of Esmeralda county will hold an all-day jubilee and celebration in honor of Major Minnecassott, the famous mule awarded to Goldfield precinct by William Jennings Bryan as the precinct which showed the largest percentage of gain in last fall's election over previous elections. The major is now in our midst and we want all other good Democrats to be, also. Therefore, on the fourteenth of June, the Esmeralda county Democrats have prepared to entertain the fellow Democrats from every county in the state with one of the most unique and altogether enjoyable celebrations ever held in the west, and we especially invite the editors of all Democratic county central committees, all Democratic town and county officials, all the Democratic members of the last and preceding legislatures, and all who go to make up the rank and file of the militant Democracy, to be with us on that day. There will be a monster parade and festivities at the park in the afternoon, a big supper and speechfest at night, and all the Democratic leaders of the state will be present, including Governor Dickerson. It will be a state rally of Democrats and we want you to come and enjoy the day with us and rejoice over the good times that have come to the country under the new Republican administration. Respectfully,

CHARLES S. SPRAGUE, J. F. VARDAMAN, R. L. HUBBARD, Committee.

COLUMBUS CON. WILL SHIP AGAIN MONDAY

Salt Lake City, June 9.—Tony Jacobson, general manager of the Columbus Consolidated mine, is down from the Alta camp. He says that Superintendent Al Jacobson has improved in health and will again assume charge of the properties.

During the past week they have experienced some delays in getting out ores, and there has been some loss in consequence. Now the management has the ore channel opened up in good shape, and no more delays are looked for. Beginning with Monday the teams will be hauling the rich ores down to Sandy, and by the close of the month the company should be able to make a good showing.

The new pump has been installed and is taking care of all the water that was encountered in the opening up of the east drift on the fourth level. Work has been resumed on this drift and will be hurried along to early connection with the ore channel, as was found on the upper level. With the ore opened up to both the east and west the mine will be in condition to make a new record in the matter of shipping a first-class product.

WATER RECEDING.

Provo, June 8.—The cooler weather has had the effect of causing the water of the Provo river to recede over a foot. All danger is not past, however, as the course of the river has at several points been changed, sand bars have been built up and embankments weakened. At Carville many acres of land were inundated yesterday afternoon, and the Fort field and the brick yard are considered danger points.

PARK CITY HIGH SCHOOL GRADUATES

Park City, June 5.—The following young ladies and gentlemen received their diplomas from the hands of J. L. Kearns, principal of the high

school, Wednesday evening in the Dewey theater: Kathryn Shields, Ethel Rasband, Ethel Hales, Kathryn Sullivan, Nellie Mitchell, Susie Shields, Ada Kimball, Adeline Newcomb, Tessie Beggs, Otto Weeter, Will Shea and Ralph Townsend. In presenting the diplomas to the graduates Mr. Kearns urged them to be loyal, and giving them as an example the Mormon people coming out west and settling in these valleys of the mountains. Other speakers of the evening were the Rev. C. L. Martin and Superintendent A. Griffin. Ralph Townsend gave the salutary address and Tessie Beggs delivered the valedictory.

CITY COUNCIL NOTES.

Park City, June 7.—The city council met Thursday evening. Bills to the amount of \$2,771.26 were ordered paid. The treasurer reported \$4,327.06 on hand June 1. Justice of the peace reported 34 cases tried and collected in fines \$263.

The council reported six deaths in the month of May, three adults and three children. Milk and food inspector reported that he had found several peddlers with short weight butter and had given them warning.

The Park City Military band petitioned the council to have the band stand replaced at that it could give open air concerts. The marshal was instructed to look after the matter. The special committee reported progress on the negotiations respecting the waterworks system.

MINING NEWS

OIL USED IN THE KELLY SMELTING PROCESS

Salt Lake, June 9.—Since local attention was called to the Fink smelting process, by which a greater percentage of values could be recovered from the rock, at a lower cost, than can be obtained by the old process now employed, a great many smelting methods have sprung into existence. One man who was employed around the Fink plant is said to have lost his position by reason of being inefficient, and he immediately began experimenting on a smelting process of his own. The Catton process is being tried out in the northwest county with some degree of success, and now the Kelly process has been sprung in Los Angeles, and is heralded as a world beater.

A demonstration made last week of the Kelly processes of smelting with oil in a specially constructed furnace was a success, the work having been done in a 25-ton stack located at the plant of George M. Babcock, who has been associated with Mr. Kelly in bringing his furnace and his processes to the present state of efficiency. Scores of mining experts and owners of copper, iron, gold and silver bearing properties contend that it will revolutionize the smelting of ores throughout the entire country and the world wherever crude oil is obtainable at a low cost. Economy is the keynote, and the cost of production by old methods, with a coke furnace, is reduced by the Kelly processes to such an extent that it will be the means of developing hundreds of properties that have not been worked because of the heretofore prohibitive cost of production.

The demonstration was on copper, and the contention that the Kelly processes kill the sulphur fumes was conclusively shown to those who prior to this time had said that it could not be done. This destruction of fumes removes one of the chief obstructions heretofore raised against the location of a smelter in the vicinity of Los Angeles, and it may therefore be concluded that the present plans of the company will develop rapidly.

Although the furnace is a radical departure from the old lines, there being many novel and patented features, it is the Kelly processes that underlie the whole working principle, and to which the chief value is attached. Mr. Kelly has completely upset all heretofore known theories, and, according to experts, has accomplished the impossible. Just what the Kelly processes are is known only to the inventor and his associates, but that they do what is claimed for them is proved by the production of better than 98 per cent matte from a 9 per cent ore containing sulphides and running high in silica.

The value of the Kelly processes lies not only in the low cost of extraction, but in the purity of the metal poured off and the small percentage of values in the slag.

A company has already been formed for the practical promotion of Mr. Kelly's inventions, and the stock will be taken up by a limited number of local investors and capitalists.

Mr. Babcock, when seen concerning the plans of the company, said that although they had not been perfectly formulated, the initial work will probably begin with the erection of several twenty-five, fifty and 100-ton stacks, for which orders are received prior to and contingent upon the success of the demonstration just given.

There is a great amount of interest manifested in the proposed custom smelter to be erected at tidewater, which will mean the development of

a vast area of ore producing properties throughout the entire southwest. PROGRESSIVE MINE IS GETTING INTO ORE

Salt Lake, June 9.—According to Roy Bohn, they are making good headway in opening up the ore bodies in the Progressive properties in Beaver county. Interested with Mr. Bohn in this property is Isadore Lessing, L. B. Bohn and James Barrett, and they are now engaged in running a drift from the 250-foot level to the east. The drift is expected to cut the main ore body at a distance of 350 feet from the shaft, which will place the working at a depth of 1,000 feet over ANDERSON'S mine. Some ore has already been cut in driving this channel, showing the presence of as much as \$100 to the ton in silver, copper and lead values.

In that portion of Beaver county where the Progressive ground is located development work has not been carried on to the extent that would fully justify a conclusion of what the final results will be. Engineers who have conducted examinations from time to time are of the opinion that the showing near the surface is indicative of large ore bodies at depth. In the progressive ground the conditions are most favorable at this time, and Mr. Bohn says that he feels sure that they will be shipping a good tonnage of ore regularly before the close of the year. He believes that he and his associates will be able to show a nice profit on the ores mined, which will result in greatly stimulating the mining industry in that section and finally in the development of a considerable amount of high grade ores.

BOSTON-SUNSHINE HAS A \$13,000 BRICK

Salt Lake, June 9.—The bullion produced by the Sunshine-Boston mill during May has just been brought to the government assay office. Its value is estimated at \$13,000. The mill has low metal take from 1,000 tons of mineral bearing rock. When it is considered that this is the result obtained from the second month's run at the mill, the showing is most gratifying to all those interested in the property. It proves that the company can make a profit on its operations at the outset, and that intelligent management will make the undertaking a big financial success just as soon as the production and treatment is launched on a large scale.

The Dorns, who have made a big success of the Mercer properties, are at the helm. George H. Dorn is on the ground and is giving the property his personal supervision. The initial capacity of the mill is about 4,500 tons a month, and now that the project has proven that it can be handled successfully it is probable that the mill plant will be increased in proportion to the increased tonnage that is blocked out underground. The ore is of the low grade similar to Mercer, which has distributed over \$3,000,000 in profits.

RESULTS THAT REMAIN.

Are Appreciated by Ogden People.

Thousands who suffer from backache and kidney complaint have tried one remedy after another, finding only temporary benefit. This is discouraging, but there is one special kidney medicine that cures permanently and there is plenty of proof right here in Ogden.

Here is the testimony of one who used Doan's Kidney Pills years ago, and now states that the cure was lasting.

James Rennie, 2974 Washington avenue, Ogden, Utah, says: "It gives me pleasure to state that since using Doan's Kidney Pills, I have not suffered from the slightest symptom of kidney trouble. For nearly five years I was made miserable by a constant flow of urine, and my back ached. I was also caused a great deal of annoyance by the kidney secretions. When Doan's Kidney Pills were brought to my attention, I procured a box at Bardon's pharmacy, and was cured. I know of others who have taken this remedy with excellent results."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for the United States.

Remember the name—Doan's—and take no other.

At the Opera.

"You see some queer things at the opera now and then," the opera-goer remarked. "Now, last night, for instance, at 'Samson and Delilah' you know they cut off Samson's hair and dress him in rags and let a little pauper child as poor as I was dressed as he bring him on the stage and pull the house down. Well, then that little pauper child puts her arms around Samson's neck to comfort him when they have finished giving him the merry ha! ha! a diamond ring about as big as a bird's egg is blazing on her little finger."—New York Times.

Pineales—new Kidney remedy—are for all diseases of the kidneys and bladder. They act promptly in all cases of lame back, rheumatic pains, inflammation of the bladder, urinary disorders and weak kidneys. Sold by Geo. F. Cave and Depot Drug Store.

Echo of Real Value.

Emerson Hough, the author of several popular novels, is very fond of outdoor life. It takes a good man to beat him when it comes to telling a story around the camp fire at night. While camping out in the Adirondacks with a party of his friends, the conversation turned on echoes and how plainly they could be heard. Echoes were getting louder and louder, until silenced by the following statement by Mr. Hough: "Out in the Rocky mountains it takes eight hours to hear the echo of your voice. When I camp out there, and just before I pull the blankets around me for the night, I shout out: 'Time to get up!' and—do you believe it?—the echo wakes me next morning!"

Hard Tasks in Life.

It is always easier not to feel, than always to feel right; and easier not to act than always to act well. For he that is determined to admire only that which is beautiful, imposes much harder task upon himself than he who, determined not to see that which is contrary, shuts his eyes.—Colton.

Lake Erie Rich in Fish.

Lake Erie is the richest body of water in the world in fish.

NEGRO TOWNSITE AND LAND COMPANY IS INCORPORATED.

Denver, June 9.—The organization of the Negro Townsite and Land company, with a capital stock of \$100,000, which has just been incorporated here, marks the beginning of a movement to improve the condition of the negroes of Colorado. The object of the company is to acquire a tract of land where the negroes of the state may follow agriculture.

The leaders of the soil state that the tilling of the soil is a natural occupation of the colored race and

that greater progress can be made in agriculture than in competition with the white race in other pursuits.

The company has been offered several tracts of land throughout the state but has not determined where the colony will be located.

LEADERS IN RACE PASS THROUGH JUNCTION CITY

Topeka, Kan., June 9.—Ford car No. 1 and the Shawmut car, leaders in the ocean to ocean race, passed through Junction City, seventy-two miles west of here, late this afternoon, having

eft Topeka shortly before 9 o'clock this morning. At Junction City the Ford car was 15 minutes in advance. Ford car No. 2 and the Acme car did not leave Topeka until afternoon and have not been heard from since.

Provo, June 9.—Messrs. J. M. Westwood, M. L. Pratt and C. D. Arthur, comprising the Indian War Veterans' commission, have completed their official labors in Provo in compiling the records of service of the Indian fighters, and have gone to Pleasant Grove to prosecute their labors in that city.

FRIDAY AND SATURDAY SPECIALS

AT THE Business Change Sale

It is true our sale has been in progress for ten days, but the people of Ogden and surrounding country have not yet lost interest in the low prices which prevail. We believe that every person who has visited our stores has gone away perfectly satisfied that we have, without doubt, commenced one of the most powerful money-saving sales that has ever been advertised in Ogden City. Many people will be surprised at the changes we are going to make in our business—but they must come. In order to make the changes we contemplate, we must close out a great part of our large stock of merchandise so that one part of our store will be absolutely empty. This must take place by the third of July. Then we will be ready to give the public our plans from start to finish. If prices and quality of goods have anything to do with the sale of merchandise we will surely accomplish what we have started for.
